Education

- Georgia Institute of Technology** Atlanta, GA
Master of Science in Computer Science; GPA: 3.80 Aug 2022 – Dec 2024

Programming Skills

- Languages:** Python, Java, JavaScript, TypeScript, Go, C++, SQL/NoSQL, HTML, CSS, Shell, JSON, YAML
- Libraries & Frameworks:** Spring, React, React Native, Next.js, LangChain, TailwindCSS, Django, Flask, OpenAPI
- Technologies & Others:** Git, Maven, CMake, AWS, RESTful APIs, Docker, Kubernetes, Terraform, PostgreSQL

Experience

- Triple** Pittsburgh, PA
Software Engineer Sep 2025 - Present
 - Built a serverless S3 to Redshift ETL pipeline using Python Lambda EventBridge and the Redshift Data API with idempotent upserts schema evolution and Datadog monitoring.
 - Developed merchant data scraping and cleaning pipelines including deduplication fuzzy matching and address standardization to support analytics and matching workloads.
 - Owned ingestion services using Lambda and ECS scheduled tasks with Terraform and Terragrunt infrastructure as code IAM and KMS security controls and CI based quality checks.
- EduPolaris AI** Los Angeles, CA
Tech Lead & Software Engineer Aug 2024 - Sep 2025
 - Led production-level feature delivery in a startup setting, from ideation to deployment, collaborating cross-functionally with designers and engineers.
 - Spearheaded multimodal LLM integration using LangChain, enhancing platform adaptability for complex, human-centric interactions.
 - Designed and deployed scalable backend services using Java, focusing on reliable microservice communication with gRPC and Protobuf.
 - Translated Figma designs into responsive React frontends with TailwindCSS, increasing user engagement by 13%.
 - Automated Kubernetes-based container orchestration and CI/CD pipelines, cutting deployment time in half and improving release stability.
- Amazon** Detroit, MI
Software Engineer Intern May 2024 - Aug 2024
 - Designed and implemented a Java-based feature flagging system enabling dynamic experimentation (A/B testing and canary deployments) within Amazon's data services.
 - Enhanced system resilience and flexibility through AWS AppConfig-based decoupled configuration management.
 - Optimized data service APIs, reducing query latency from 10s to 50ms through targeted performance tuning.
- U.S. Food and Drug Administration** Silver Spring, MD
Research Fellow Nov 2017 - Oct 2022
 - Directed multidisciplinary teams on drug analysis pipelines, building scalable systems for reliable data interpretation and regulatory compliance with Python.
 - Delivered clear technical insights to both technical and non-technical stakeholders, including FDA leadership, ensuring alignment across diverse projects.
 - Authored 6 peer-reviewed publications and over 20 technical reports, fostering knowledge transfer and process improvement in complex, high-stakes environments.

Projects

- Stock Analysis Agent:** Developed an automated stock analysis agent using Python, Flask, LangChain, and LangGraph to analyze based on real-time financial news, market sentiment, and historical data.

Certifications

- AWS Certified Cloud Practitioner**, Amazon Web Services – 2025
- NVIDIA Certificate of Competency for Agentic AI Development**, NVIDIA – 2025
- Certificate of Google AI Essentials**, Google – 2025
